

## Service Fees

*Clark Family Practice* accepts cash, debit card, credit card, CareCredit, and some insurance plans.

Please note that charges may vary based on the level of care needed to properly diagnose and treat a patient. Most of the time, visits will fall within the range provided, but in more complex cases there may be additional testing or services needed to properly diagnose a patient. If any labs are performed and sent to a third party laboratory the patient will be billed directly from the laboratory.

We can administer any immunizations we do not carry for a \$25 injection fee. We will write the prescription for you to pick it up from your pharmacy and you bring it back to us for injection.
